Will Your Pictures
Satisfy You Even After
10 Years or More ?

Yes!

Even when viewed with the advanced TV technologies of the future, today's incredible 4K image quality will be high enough to keep you completely satisfied.

Get Great Instantaneous Photos!

When you shoot videos with 4K PHOTO, you can also extract wonderful instantaneous still images.

Even 4K Images Stay in Focus

With Panasonic's 4K camcorder, auto focus has remarkable speed, precise tracking, and super stability.

4K Cropping for Mistake-Free Full-HD

When shooting in 4K, your subjects easily stay framed, without blurring, because you can edit the images in the camera and save them in Full-HD.

Just Like Images in the Movies

Cinema Like Effect allows Dolly Zoom and other kinds of professional-like shooting techniques they use in cinema films.

4K Definition Keeps Memories Crisp and Clear, Now and in the Future

4K Video Recording

The WXF995 and VX985 record in 4K [3,840 x 2,160] format with four times the resolution of Full-HD. This delivers true-to-life images for a wide variety of shooting situations, in extremely high detail.

4K High-Precision AF – High-Speed, High-Precision AF Technology in 4K –

An image sensor with 50-fps readout and a precise focus lens drive for 4K images enable superior focusing speed, stability and tracking performance. Complex 4K focusing is also automated for comfortable framing of stunning 4K shots.

Speed

Even when a subject suddenly enters the frame, it is instantly focused.

Tracking Performance

The subject's movement is also tracked.

Stability

The subject stays in focus even when there are some obstacles passing through.

Note: The frame is not actually displayed during auto focus.

4K Photo Mode

4K also offers more options in extracting still images from your footage. 4K has four times the resolution of Full-HD Video and allows sharp, detailed prints of single frames up to the size of A3. Filming in 4K means you can easily grab those impressive moments in your video footage that are hard to capture with traditional photography.

Marking Cutout

Mark your favorite scenes when recording in 4K Photo mode for easy 4K Photo cutouts.

4K Images Offer Beautiful Editing Results

4K Cropping

When zooming takes your subjects out of the frame, or causes hand-shake, 4K Cropping solves the problem. Cutouts with Full-HD quality from 4K images can be easily done using only the camera, entirely after shooting.

NEW Post Auto Tracking (Auto Tracking Crop)

Once you record your child at wide-angle in 4K, the child's face is automatically tracked. You can extract your child's Full-HD movie with no framing-out. You can also add the image stabilizing effect at the same time.

NEW Post Close-up (Fixed Crop)

When there is little movement and a part that you don't want is included, you can shoot at wide-angle in 4K and then easily crop the part you want later.

Post Panning (Zooming Crop)

By changing cropping parts, you can create smooth and exact panning.

* Only two times can be set: Approximately 20 seconds and approximately 40 seconds.

NEW Post Manual Tracking (Manual Tracking Crop)

Just touch subjects that move unexpectedly, and track them intuitively with your finger to shift the angle of view.

Post Stabilizer (Stabilizing Crop)

You can compensate for blurring after shooting. Stable videos can be recorded by automatically adjusting the cropping position.

Post Zooming (Zooming Crop)

With Smooth Zoom, you get smooth zooming without any zoom blur. It's also easy to zoom in on an off-center subject without maneuvering the camera angle.

* Only two times can be set: Approximately 20 seconds and approximately 40 seconds.

Cinema Like Effect

* Available only with MP4 1080/28M format.

Slow & Quick Video*

While shooting in slow motion, you can lower the frame rate and change to quick motion video. By combining slow and quick motion for active scenes, you can achieve dramatic effects just like in a movie.

Slow Zoom

Slow zooming, which is also often used in movies and difficult to do manually, is easily done. You can add tension to otherwise simple scenes, and express emotional shifts in subjects.

Dolly Zoom*

This technique zooms only the background while maintaining the subject's size to express feelings such as confusion, distress, or surprise. Your footage can be as thrilling as a suspenseful film.

Slow Motion Video*

Effective for scenes like these

Sports

Pet

Hobby

Records Full-HD (1920 x 1080) at 100 fps. And the Intelligent Frame Creation of the Crystal Engine interpolates to an equivalent of 200 fps, for smooth slow motion. Switches to slow motion while you touch the icon on the LCD screen during shooting.

Note: You can switch up to three times during one shooting.

24p Recording

The same 24p recording that's used in movies can be used in 4K and Full-HD videos, to achieve a movie-like mood.

Premium Picture Quality

Leica Dicomar Lens

This high-performance lens has passed the stringent inspection standards of Leica Camera AG for aspects such as resolution and contrast. In addition to rendering sharp, crisp images, it produces the distinctive nuances and subtle shading that Leica lenses are renowned for.

1/2.3-inch BSI Sensor

Increasing the readout speed has made it possible to handle large-volume 4K data. This suppresses the rolling shutter distortion that often occurs when shooting moving subjects.

Crystal Engine 4K

This high-speed LSI processes the massive volume of 4K data quickly and accurately. A new noise reduction system achieves clear images with minimal noise even in darkness.

20x Optical Zoom with 4-Drive Lens System

By driving each of four lens groups separately, the drive ranges are reduced, resulting in high image quality and high-powered zooming, with a compact camera body. This gives the WXF995 and VX985 their compact size even with a 20x optical zoom and 4K definition.

With 1 zoom lens group

Professional Video Camera

With 4 moving lens groups

WXF995/VX985

Functions for Both Enthusiasts and Pros

Tiltable Viewfinder

The Electronic View Finder of WXF995 helps when shooting in bright daylight conditions, and contributes to proper framing. The slide and tilt mechanism provides flexibility for various shooting postures. And the eyecup is detachable to comfortably fit either eye.

Slide and Tilt Mechanism

Detachable Eyecup

Note: The Viewfinder and LCD Monitor cannot be used simultaneously. Also, since the icons displayed in the Viewfinder cannot be operated, open the LCD Monitor for touch operation.

Multi Manual Dial

By pushing or rotating the manual dial, you can easily adjust allocated functions, like focusing and changing the iris.

Adjustable Items

- Focus
- White Balance Mode
- Shutter Speed
- Iris
- Sharpness
- Color Saturation
- White Balance Fine
- Exposure

Wind Shield Zoom Microphone

A special damping material is provided in the space between the mic and the mic net to suppress wind noise for clear recording always.

High-Quality Audio Parts

Aluminum electrolytic capacitors for audio use

High-S/N mics

Four 6mm-diameter, high-S/N mics and aluminum electrolytic capacitors reduce sound distortion and increase clarity.

Sound Scene Select

Record sound "just as you hear it", by changing frequency characteristics according to the shooting scene.

Full-HD Beauty Meets High Sensitivity

Can You Get
Beautiful
Results in the Dark?

Yes!

The HC-V785 features a high-sensitivity sensor. This flagship Full-HD camcorder gives you brilliant images even in dim lighting.

Enjoy Premium Picture Quality

An advanced lens, sensor and engine produce bright images even in darkness or against backlighting.

Take Dramatic Slow-motion Videos

Smooth slow-motion videos turn everyday scenes into works of art.

Voices Are Fresh and Clear

The Windshield Microphone with high-quality audio parts effectively suppresses wind noise for high sound quality.

Use Manual Operation for Rich Expression

The Multi Manual Dial lets you manually set the focus and white balance.

High Sensitivity Sensor

The 1/2.3-inch Back Side Illumination Sensor has a large effective area and 34% larger pixels compared to a commonly used 1/5.8-inch sensor, suppressing noise when shooting in dimly lit places, such as indoor scenes or nightscapes. It achieves stunningly beautiful images even down to the tiniest details.

High-Power Zoom in Full-HD

Can Your Smartphone Zoom Up
Close without Blurring?

No!

The Panasonic camcorder lets you zoom up on distant subjects with Intelligent 90x Zoom and the 5-Axis HYBRID O.I.S. + while preserving the image resolution.

Less Blurring While Walking or Zooming

Five-Axis Correction and Auto O.I.S. Lock suppress blurring all the way from wide-angle to powerful zoom shots.

Dad Can Join in While Shooting!

The Twin Camera function lets you catch a shot of the family and a selfie with a rotatable sub camera.

Ideally Designed for Video Shooting

In addition to being lightweight and compact, an ergonomically designed grip snugly fits the hand for comfortable, extended shooting.

Even Captures Moon Craters!

Intelligent 90x zoom captures clearly distant objects that are too far away to shoot with conventional zoom functions.

Stable, Level Shooting and Less Blurring

**5-Axis
HYBRID
O.I.S. +**

5-Axis HYBRID O.I.S. +

**5-Axis
HYBRID
O.I.S. +**

HYBRID O.I.S. + uses five-axis correction to thoroughly suppress blurring all the way from wide-angle to powerful zoom shots. This lets you capture crisp, clear images, without blurring, in almost every shooting situation.

O.I.S. OFF

O.I.S. ON

NEW Auto O.I.S. Lock

The camera detects a scene that needs stronger stabilization (when zooming, for example), and automatically activates O.I.S. Lock. This increases the compensation area over previous models, and provides more stable images.

* When Manual O.I.S. Lock is selected, conventional operation with the button is also possible.

5-Axis Hand-Shake Detection

Roll rotation

For shooting while walking

Blurring in the roll direction from shooting while walking is suppressed to produce truly beautiful images.

Wrist movements

Across the entire shooting range

Detected blurring caused by vertical or horizontal wrist movements is corrected using a lens in the optical system.

Arm movements

For zooming

Areas of the sensor that are not used for zooming are electronically controlled to compensate for hand-shake.

Manual O.I.S. Lock

The button is pressed and held when necessary.

Auto O.I.S. Lock

O.I.S. Lock is automatically controlled by the camera.

Level Shot Function

The Level Shot function automatically detects and corrects the tilting of captured images. The setting can be adjusted to one of three levels (OFF, Normal, Strong*) depending on the shooting conditions.

Level Shot Function OFF:

Images are often tilted without realizing it.

Level Shot Function ON:

An acceleration sensor and a gyrosensor detect the tilt, and automatically level the scene.

Clear Shots with Excellent Detail in Both Bright and Dark Areas

HDR
MOVIE

HDR (High Dynamic Range) Movie

By combining two images taken with different exposures, the HDR Movie function suppresses blown highlights and blocked shadows for crisper, clearer videos. Even in difficult shooting situations, such as backlighting, you can easily capture natural videos with excellent gradation. A dedicated HDR button enables quick mode changes when necessary.

Note: This function is not available with 4K mode nor with 24p format.

HDR OFF

HDR ON

HDR OFF

HDR ON

28mm Wide-Angle*

The 28mm wide-angle* fits more people and more of the background into the frame. This is especially handy when you want to take a group shot in a small room. It fits your subjects in even when you shoot from up close, and makes it possible to pick up even small sounds with the mic.

* 35mm camera equivalent

35mm Lens

28mm Wide-Angle

Intelligent 90x Zoom/Optical 50x Zoom

When using Intelligent 90x Zoom, Intelligent Resolution technology lets you shoot at high zoom rates while preserving the image resolution. You get sharp images of highly detailed objects – without the blurry edges.

	WXF995	VX985	V785	W585	V385	V180
Wide-Angle	30.8mm*	30.8mm*	29.5mm	28mm	28mm	28mm

Optical Zoom	20x	20x	20x	50x	50x	50x

* 4K

Double Your Fun with the Twin Camera

Sub Camera
• Pan/Tilt and Retractable

Twin Camera Function*

The W585 includes a pan/tilt and retractable sub camera. Two cameras let you easily take shots from two different angles simultaneously. For example, you can catch a shot of the family at the side and a selfie, or both a tele and wide-angle shot from the front. Vertical $\pm 20^\circ$ rotation function for the sub camera has been included for greater shooting versatility.

Note: The WXF995 allows 2x zooming with the sub camera (except 4K mode).

* This function is not available with 24p format.

Main Scene and Yourself

Tele and Wide

Main Scene and Person Aside

Narration Mode

This mode reduces surrounding sounds to give greater emphasis to the voice of the person shooting. When taking selfies with the Twin Camera, it captures clearer narrations.

Backup for Twin Camera*

A Picture in Picture image and a main camera image without a sub window are recorded simultaneously, so either image can be played separately later. This assures you of getting a good video even if the subject in the sub window should move out of the frame and spoil the Picture in Picture shot.

* AVCHD 1080/50i only

Note: This function is also available with Wireless Multi/Twin Camera function.

Wide Variation of Sub Windows

The sub camera images are recorded into sub windows, and their display positions can be changed by touch operation while shooting. The sub window size can be changed to three types, including a 1:1 type that is ideal for taking selfies. You can also select the frame color, apply a shadow effect, and use other sub window variations.

Note: There is no sub window frame when shooting in 4K.

Move by touch operation

Change sub window frame

4 Colors [Gray/Green/Pink/Orange]

Select from 3 sub window sizes

16:9 Large/Small size

1:1 for Selfie

No frame

Flat shadow

Capture Multiple Scenes Simultaneously - Connect Three Devices and Select the Input from Two -

Wireless 
Multi Camera

- This function is not available with 4K mode nor with 24p format.
- This function uses Wi-Fi signals. The distance that Wi-Fi signals will reach is 5 to 10 meters (for a smartphone) or 1 to 5 meters (for a wearable camera) when there are no obstacles or other signals present. However, this should be considered only as a guideline because the distance may vary greatly depending on the devices being used and the environmental conditions.
- For Android devices, those with four or more CPU cores (Quad-Core CPU or higher) are recommended. For iOS devices, the newest models are recommended.

Wireless Multi Camera

Using Wi-Fi, you can link to as many as three smartphones and simultaneously record up to two of them as sub windows. The two sub-window images can be interchanged, and their display positions can be switched. This lets you shoot from a variety of angles and view points, to capture a level of emotional impact that just isn't possible with a single camera.

More than just the game

Capture the cheerleaders and audience too.

More than just your child

Also capture her friends too.

More than just the show

Capture both children.

Image App.
UNWIRE YOUR CREATIVITY

Baby Monitor

Remote Shooting

Real Time Broadcasting

Remote View

Easy Share with Highlight Photo Collage

Auto Transfer

Wireless TV Playback

Home Monitoring

Remote Shooting

The "Panasonic Image App" lets you use a smartphone or tablet as a live-view remote controller and operate the camcorder from a distance.

Remote View

Videos and photos inside the camera can be viewed on a smartphone or tablet, and uploaded to an SNS site.

Real Time Broadcasting*

You can live-stream events on USTREAM as they are being recorded in Full-HD resolution.

Note: Simultaneous Full-HD recording is not possible with the W585/V385.

Baby Monitor*

You can check on the baby with a smartphone or tablet in another room. The Push Notification function alerts the smartphone or tablet if a voice sensor detects the baby waking up and crying.

Panasonic Image App

Panasonic provides a free, dedicated application software called "Panasonic Image App" for iOS/Android smartphones and tablets.

Highlight Playback and Easy Share

You can enjoy Highlight Playback with a smartphone or tablet right after shooting. Favorite scenes can be shared on SNS with simple drag and drop operation.

Highlight Photo Collage

Create a highlight photo collage with the best scenes picked out automatically from video.

Home Monitoring*

When you are away from home, you can monitor and record there with high-quality live video, and speak to your family or pets using your smartphone or tablet.

Auto Transfer (Wireless PC Copy)*

Images are transferred from your camcorder to a computer via the wireless access point at home.

Wireless TV Playback*

An access point at home can be used to transfer data wirelessly to the TV or a tablet in the living room, or other rooms in the house. You can play images on the large-screen display.

Note: AVCHD and MP4 720p only.

Creative and Handy Functions Give You Greater Shooting Enjoyment

Night Mode (IR) WXF995 VX985

Night Mode lets you shoot in the dark (0 lux). You can capture nighttime images without waking the baby up.

Night Mode [IR] OFF

Night Mode [IR] ON

Creative Control All Models

Four filter effects make it possible to shoot impressive video recordings that are matched to the shooting situation.

Miniature Effect

This effect defocuses peripheral areas while keeping the focus point sharp and clear making life-size subjects look like a diorama.

8mm Movie

You can record motion pictures with a faded retro effect.

Silent Movie

You can record motion pictures that are similar to black-and-white silent films by lowering the amount of peripheral light.

Time Lapse Recording

A scene that moves slowly for a long period of time is recorded frame by frame with an interval, as a short time motion picture.

Baby Calendar All Models

Simply set the baby's birth date and name to display thumbnail images of scenes arranged by month around that date. Easy to find the scenes you want.

50Mbps MP4

WXF995 VX985 V785 W585 V385

In addition to the AVCHD format, Full-HD (1,920 x 1,080) 50p videos can be recorded in the 50-Mbps MP4 format. The MP4 format is suitable for editing videos on a computer.

* Playback on a VIERA TV and Blu-ray disc player cannot be guaranteed for data recorded in MP4 50Mbps.

iA (Intelligent Auto) All Models

This powerful function senses the shooting conditions and automatically makes the settings and activates functions that deliver optimal results.

iA Plus– Easy to customize settings without releasing iA mode All Models

The iA Plus mode enables you to adjust exposure compensation and white balance by just pressing the button on the LCD.

Brightness Control

You can adjust the exposure compensation accurately and easily.

Color Control

You can adjust the white balance from warm red to cool blue.

Stop Motion Animation Assist WXF995 VX985 V785 W585 V385

By moving the subject slightly and shooting still images, you can create a unique animated slideshow. Previously taken photos are displayed with an onion skin effect for easy layering.

Level Gauge **All Models**

Level Gauge visibly assists you to shoot straight with horizontal and vertical gauges. It helps to correct even slight tilting.

Zoom Mic **All Models**

The Zoom Mic function links the microphones to the lens action. When you zoom in on a subject, the microphones focus on the sound in that same direction.

Wind Noise Canceller

WXF995 VX985 V785 W585 V385

Automatically eliminates wind sounds picked up by the built-in mic to provide clear recordings of the subject's voice.

HD Writer*

All Models WXF995 / VX985: AE 5.4, V785: AE 5.2
W585 / V385: LE 3.2, V180: LE 3.0

Downloadable HD Writer software makes it easy to play or edit videos on your PC and have more fun when the shooting's done.
